# Dashboard – Settings

Dashboard Settings

When user want to customize or add a different dashboard with their own needs, select item "Dashboard Setting" at menu of username at right header area to go to Dashboard Setting page.
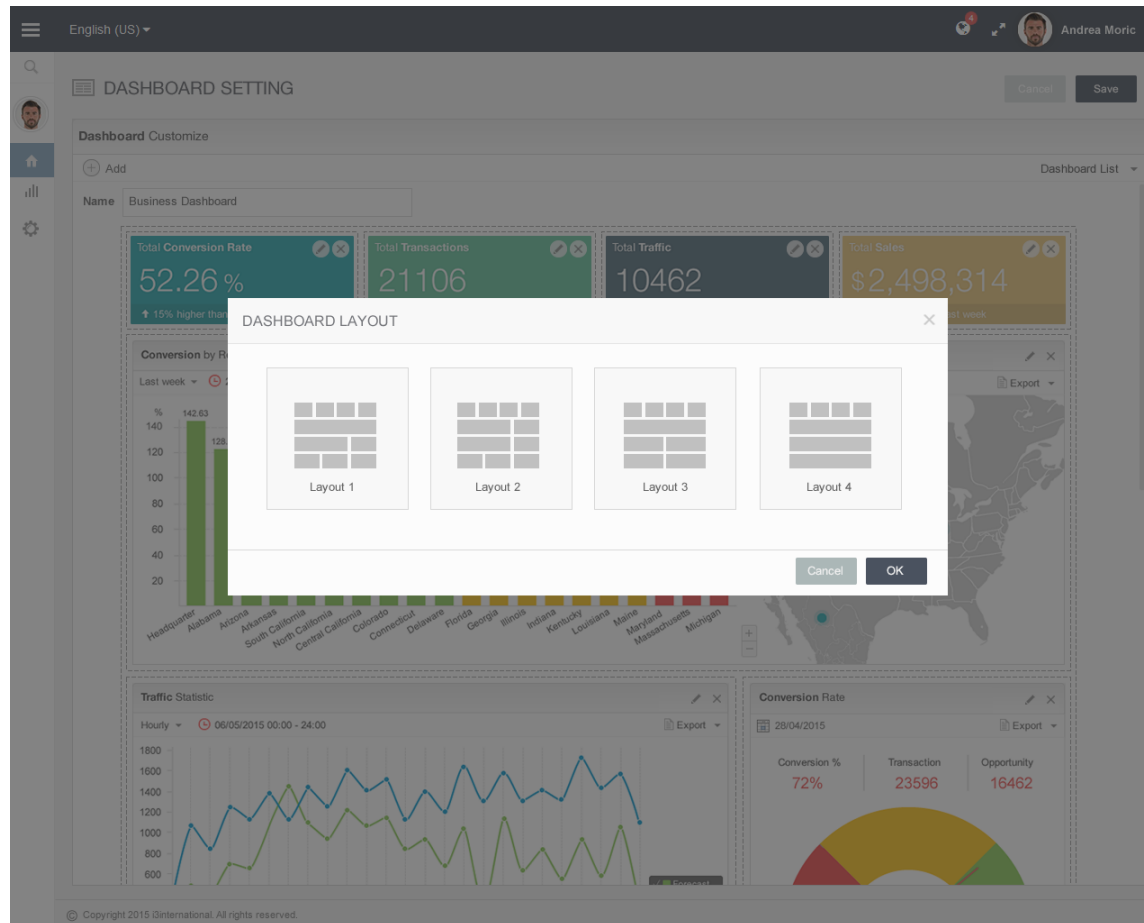

Dashboard List

From Dashboard List, by default it will exist 3 catalogue types in system CMSweb which they represent for 3 popular and important user types: Technical Dashboard, Store Level Dashboard, Business Dashboard.
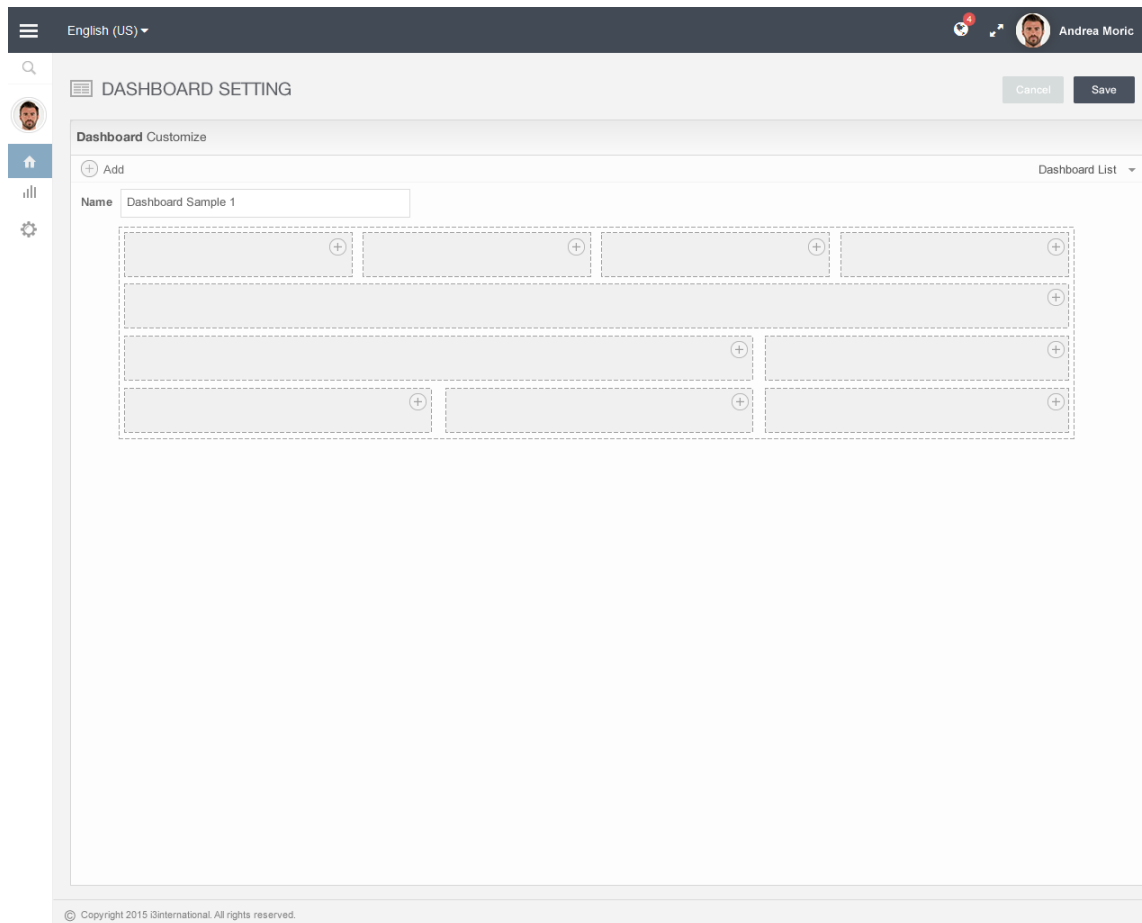

If one in them is already one type which they like, user only need to pick one convenient and use. Besides, at each type, user can change other widget on this dashboard or remove it if unnecessary.

Add new Dashboard

Click "Add" icon area to add new Dashboard. User will select one Dashboard Layout which he like to view.
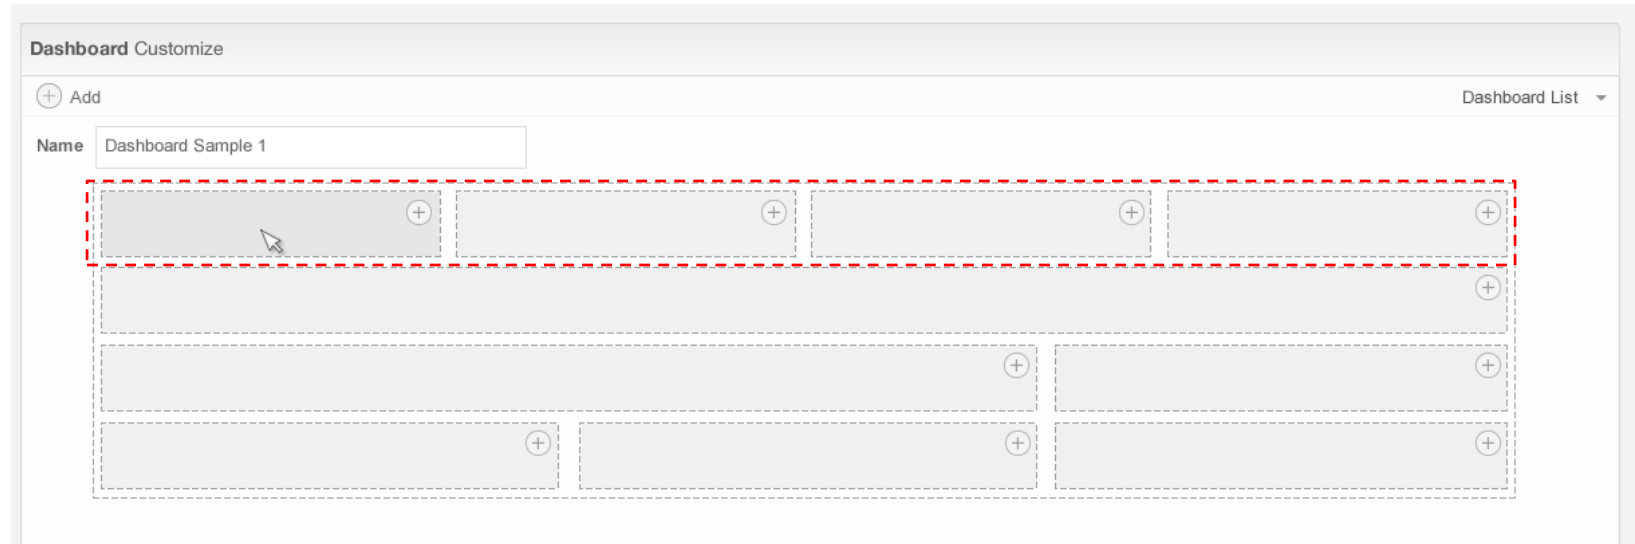

(Note: 4 layout structure images in GUI design are only the samples. It may be different with layout structures of implementing as 4-3-2-1; or 4-2-1-2-2; 1-1-1-1; or whatever layout structure.)

Click "Add" icon area to add new Dashboard. User will select one Dashboard Layout which he like to view.

After select one Dashboard Layout sample, the new Dashboard with empty widgets will be create on.
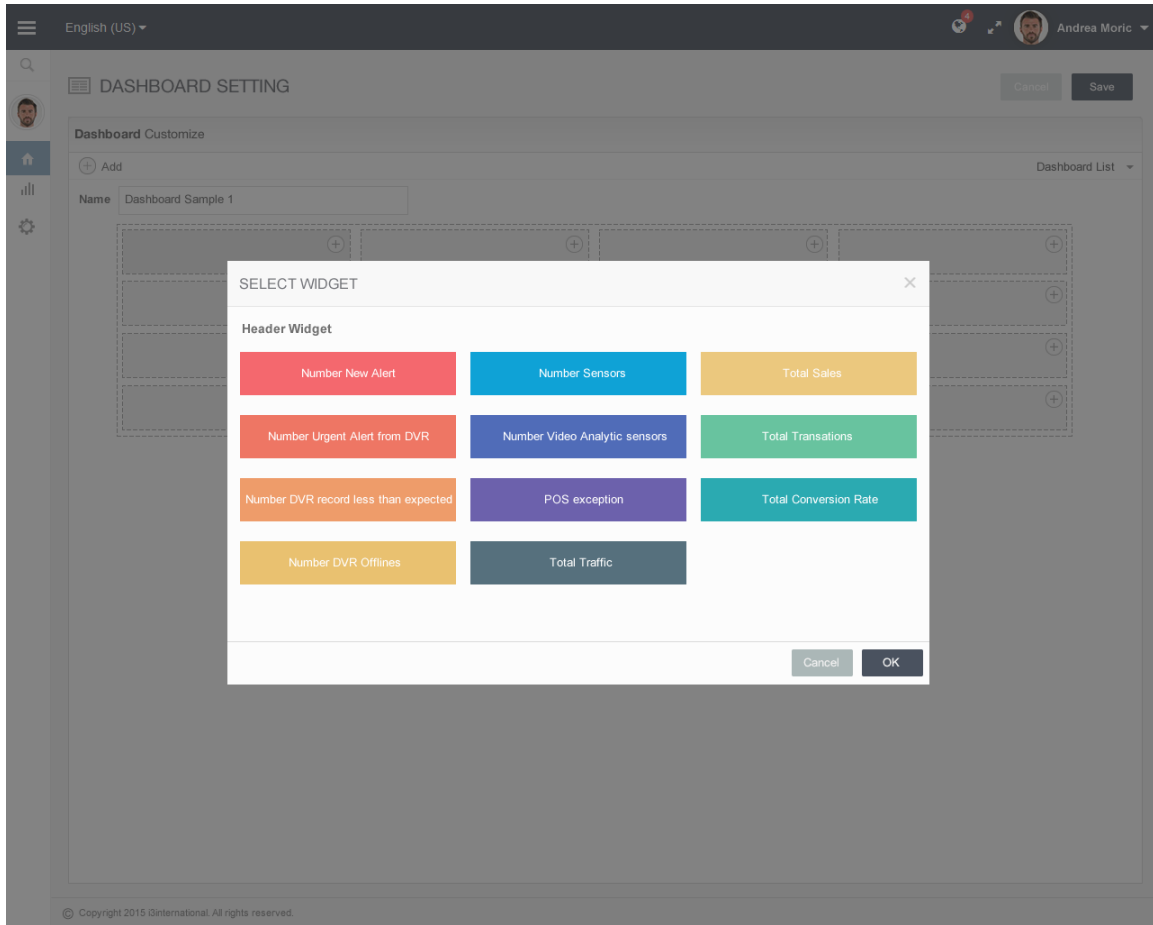

Add new widget

At each Dashboard created, it will have one field of name Dashboard which can change by user then. And this change will added item into the Dashboard List.
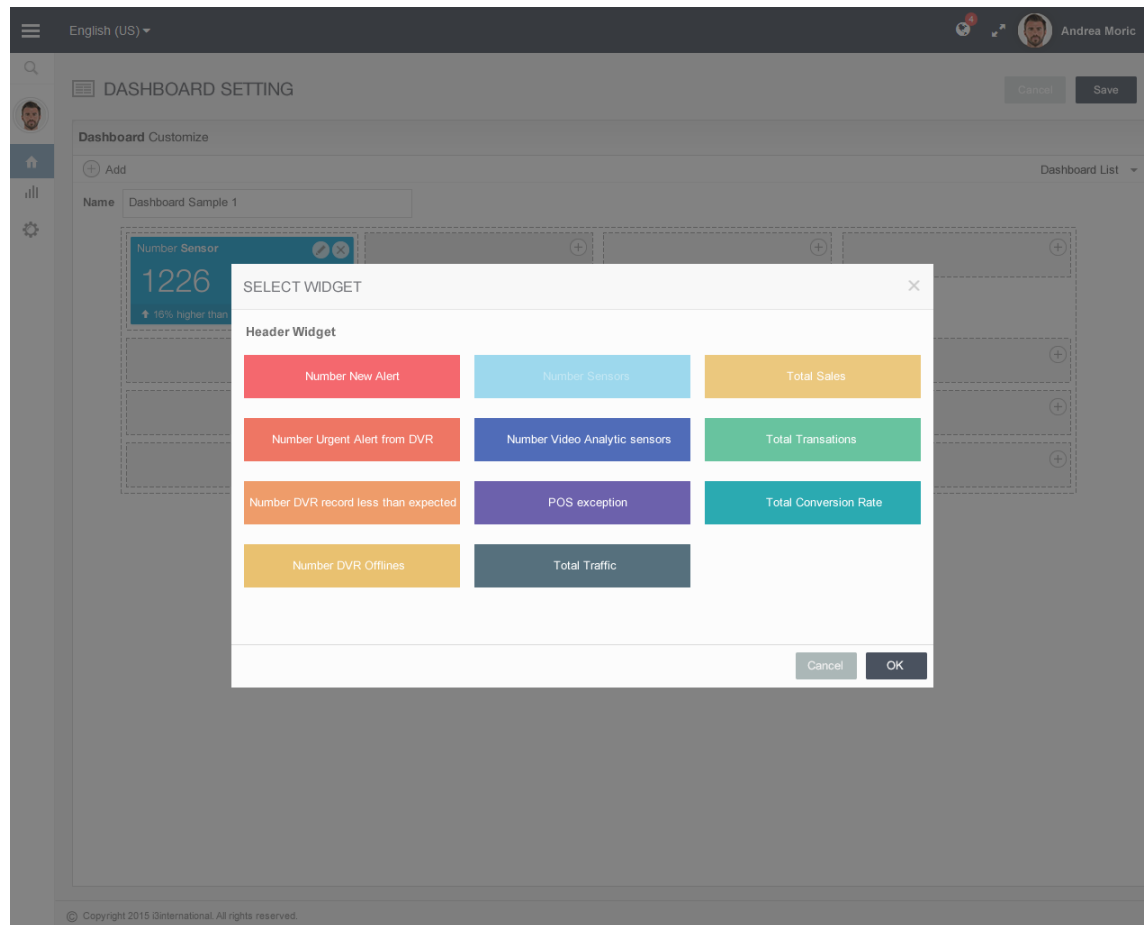

Choose sample widgets for Header Widget

Although allow user can customize the Dashboard, but it need follow by one overall structure of the Dashboard. It means 4 boxes on top will only represent numbers for Header Widgets with the trending.

Therefore, if user add widget for each this box area, it will displays all widgets which belong to Headers only.
